may apply. This decision was reached after some discussion regarding a number of important pests which will have to be filled if the Democratic plans are carried into effect, and as clean a sweep as possible is made of the Republican office holders. It was pointed out that the board would have to rely on the committee to a great extent, as it would be impossible to investigate the party claims of every applicant for a job who may come hat in hand, looking for a slice of Bourbon pie.

Still another matter which the new board discussed at last night's session was the system on which the "quandary." out of town districts will operate the road work. It is understood that plans were made whereby the clerical

WIRELESS LICENSE WON BY BOY SCIENTIST HERE

Tyson Norgaard Carries Off Honors as He Did in Aviation Contest

Tyson Norgaard, a member of the boys' department of the Young Men's Christian Association, has just received his license as a first-class wireless amateur, being the second to receive such a license in Honolulu.

Young Mr. Norgaard is an enthusiastic practical scientist. A year ago, competing in the Evening Bulletin's aeroplane contest for boys, he won several prizes and his ingenuity in devising air-craft was commented upon very appreciatively. He is only fourteen years old, and despite the handicap of physical disability, has accomplished some remarkable things in aviation and wireless operating.

There are at present six other boys, members of the association, who are hard at work and who expect to receive their licenses shortly after the New Year. The proposed Wireless Club at the association has not yet been started, but it is thought that by the middle of January it will be well under way. According to the present arrangements of those in charge of the organization of the ciub. there will be a complete wireless set installed on the roof of the building and classes will be formed and the members instructed in the Ane points
